

## 2017 ONTARIO ROCK CLIMBING GUIDEBOOK UPDATE PACK

**v20171012 (place this sticker on inside  
cover to track your update version)**

p. 231 5 routes Right of You've Been Hibbed

**The Safety Meeting Cracks** – see  
<http://www.leslietimms.ca/2017/08/risk-reward.html> for  
more information and [ontarirockclimbing.com/updates](http://ontarirockclimbing.com/updates) for  
the topo photo

**#1 Risk Reward 5.10b** - Start on the right most crack,  
on the shore. Boulder up the initial steep crack to a rest.  
Then enjoy varied cracks to the top. Belay off trad  
anchor, walk off. Standard rack. Optional #5 FFA: Leslie  
Timms, Dave Zieleniewski (p.231)

**#4 Victory Torch 5.10a** - The first crack left of  
You've Been Hibbed. Requires a boat for  
belaying. Enjoy steep jams the entire way. Finish  
on anchor of You've Been Hibbed, clean and  
lower back to boat. Standard rack. FFA: Leslie  
Timms, Dave Zieleniewski

**#9A Independent Woman 5.11b** – Climb the right side of  
the tree to start. Run out to first piece of gear (about 20  
feet). Undercling the wet but solid roof, pull around the  
corner, then jam, layback, chimney to the top. Sparse  
gear in the chimney but it is easy climbing. You can  
reach right and clip bolts of Ghost if you feel skittish!  
The route tops out. Use anchors of Ghost for seconding  
and rappel. FA: Anna Pirko p.229

p. 106 Air Jamaica – (more info) Substantial rock  
fall has made this route harder. Possibly 5.12c/d

Most of the cliff requires a boat for belaying. The two right  
most routes can be belayed from the shore. The cracks  
are short but clean, steep and require a variety of  
jamming techniques. The gear placements are quite good  
and creative trad anchors can be built on the top for top-  
belays/lower/rappel. You can walk off the formation to  
climbers right. The routes were all done, ground up and it  
is safe to do so. Climbs are described from right to left.

**#2 Gone Fisting 5.11a** - Just left of Risk Reward is a left  
leaning crack. Traverse left ward (walk the plank) using  
thin hand jams to a rest. Head up towards the roof, build  
a safety nest and crush the crux. The name blows your  
on sight. Build trad anchor and walk off/lower. Standard  
rack to #3 BD FA: Leslie Timms, Dave Zieleniewski

**#5 Sea Legs 5.9+** - Follow the finger crack to a  
roof just left of Victory Torch. Pull the roof and  
follow crack to top. Trad anchor. Requires a  
boat for belaying. FFA: Leslie Timms

p.298 Medusa 5.10c (more info) - Medusa has  
anchors, with a permadraw protecting the super  
wide section. Grade is 10c. Still needs 4s, 5s,  
and 6s to climb.

p. 203 No need to cut out coupon for coffee. Get  
Rachel to sign it.

**#3 Safety Meeting 5.11c** -The centerpiece of  
the wall. Follows angling cracks and seams to a  
large cedar tree at the top. Requires a boat for  
belaying. Standard thin rack. FA: Leslie Timms

**#3A Unknown Crack 5.8** – The crack line above  
the tree on the ledge between Zoomba and The  
Charleston. Pins at the top with awkward and  
difficult to protection on the headwall. (p.58)

p. 63 Correction on previous Update Packs. Butt  
Clencher is RESCUE#30, not RESCUE#34
